Hi Bob,

I think the general approach for identifying sites seems appropriate. I have the following comments for your consideration.

The document identifies drinking water wells and dismisses this exposure since individuals are hooked upto public water. The text needs to further clarify the overall goals of addressing groundwater contamination to return the groundwater to a beneficial use.

The document needs to clarify the landuse for the various areas identified since this may impact cleanup levels.

The document also provides calculated cleanup goals in soil and groundwater for PFOS and PFOA. It would be helpful to clarify whether these values are based on residential or industrial exposures and how they are applied to the individual properties i.e., residential values are used for all landuses.

I'll be back on Monday In case you have any questions.

Marian

Hey guys. Like you have nothing else to do.

I don't think I got any comments from you on this yet. Am I correct?

For me, this probably takes priority over the Five-Year Review Report.

Chloe: Plattsburgh's draft PA will be coming very soon.

Please let me know if any questions or problems. Thanks guys!

Bob

Chloe and Marian

Somehow the PA for the other sites at Griffiss that could potentially have PFCs was completed before Plattsburgh's.

To re-clarify, the AF is proactively sampling at all BRAC base Fire Training Areas. You guys have already reviewed the Work Plans for Griffiss and Plattsburgh, although I have not yet received the revised Work Plan for the Fire Training Area at Griffiss. The AF has already completed the initial sampling at Plattsburgh's Fire Training Area, and plans to sample the Fire Training Area at Griffiss starting Nov 17.

The PAs are essentially records searches, and make recommendations for any additional areas they feel should be sampled at the bases besides the fire training areas. I have received 2 hard copies of the Griffiss PA, and a CD, but my disk drive has decided to go ballistic, and as Dave happened to email the Griffiss draft PA Report, I am forwarding you that email (below). It has the transmittal cover letters and the PA Report. Please let me know if you would like the hard copies of the Griffiss PA Report.

The PA should address some questions Doug had as to exactly where else on the bases PFCs might show up. It may be that Griffiss has a lot more than Plattsburgh.

Please review the PA Report and provide any comments you may have to me within 3 weeks, if possible. Thanks a lot!

Bob

Bob/Heather,

I just wanted to update you with regards to the planned PFCs evaluation/investigation activities at Griffiss.

You should be receiving the Revised Work Plan Addendum, for the release determination investigation at the FT030 Fire Training Area, early next week. The contractor will performing the fieldwork November 17th-20th, you are welcome to come up and observe the work (I will be at there, probably for the duration of the field work).

We submitted a Preliminary Assessment (CD and hardcopies), for other potential PFC locations at Griffiss, earlier this week; let me know if you did not receive it (I've attached a pdf of the report and cover letters); we have requested comments NLT December 22nd.

Have a great week end!

Dave
